

Coolube® Lubricants

What is the difference between Coolube® 2210 and Coolube® 2201EP?

[Coolube® 2210](#) is ideal for metals, wood, rubber, and most plastics and is especially effective on aluminum and non-ferrous metals.

[Coolube® 2210EP](#) contains an 'Extreme Pressure' additive and is specially formulated for use with ferrous metals. Coolube® 2210EP also works with all non-ferrous metals except copper.

Unique solution ID: #1044
