Summary:

Read entire SDS prior to use. Observe all precautions. Use engineering controls to minimize human exposure to workplace chemicals.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

Component Proprietary Ingredient
CAS Number Proprietary
Percent by Weight 90 - 100

Specific chemical identities and/or percentages of composition have been withheld as a trade secret.

SECTION 4: FIRST AID MEASURES

Skin Contact

Remove contaminated clothing and shoes. Wash area of contact with soap and water. Wash clothing before reuse. Get medical attention if irritation occurs and persists.

Eye Contact

Remove contact lenses. Flush with water until all traces of material are gone. Eyelids should be held away from the eyeball to ensure thorough rinsing. Get medical attention if irritation persists.

Inhalation

Remove affected person from source of exposure. Give artificial respiration or oxygen if breathing is distressed. Get medical attention.

Ingestion

Do not induce vomiting because of danger of aspiration into lungs. If spontaneous vomiting occurs, monitor for breathing difficulty. Get medical attention.

SECTION 5: FIRE-FIGHTING MEASURES (Flash Point: >142° F [61° C])

Basic Firefighting Procedures

Treat as an oil fire. Do not use a water jet. Use water spray, dry chemical, foam or CO2 to extinguish fire. Use a water spray to cool fire-exposed containers, structures and to protect personnel. Exposed firefighters should wear MSHA/NIOSH approved self-contained breathing apparatus with full-face mask and full protective equipment. Flush spills away from sources of ignition.

Unusual Fire and Explosion Hazards

Oil will float on surface of water and ignite. Irritating or toxic substances may be emitted.

SECTION 6: ACCIDENTAL RELEASE MEASURES**Refer to Section 8: Exposure Control and Personal Protection****Emergency Action**

Isolate release area and keep unnecessary people away. Exercise caution regarding personnel safety and exposure.

Spill/Leak Procedure

Floor and surfaces may be slippery. Dike with sand or other noncombustible material. Flush area with water provided runoff does not enter drain or sewer; use absorbent material and dispose of properly.

Notification

Any spill or release to navigable water that causes a visible sheen upon the water must be reported immediately to the National Response Center (800/424-8802), as required by U.S. federal law.

SECTION 7: HANDLING AND STORAGE**Refer to Section 8: Exposure Control and Personal Protection****Handling**

Wear proper protective equipment. Avoid contact with skin, eyes and clothing. Avoid breathing vapors or mists. Do not ingest. For industrial use only. Use good hygiene practices when handling product, including changing and laundering work clothes after use. Get medical attention if you are exposed and feel unwell. The shipping and storage container is not designed to be pressurized. Do not use pressure to empty the container as it may rupture with explosive force. Containers should be completely drained, properly closed, and promptly returned to a drum reconditioner or disposed of properly. Empty containers may contain residue or vapors. Do not cut, grind, drill, weld or reuse containers.

Storage

Store product in closed containers in a well-ventilated area away from heat, sources of ignition and incompatibles. Do not store in unlabeled containers.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION**Component****ACGIH****OSHA****Engineering Controls**

Use appropriate ventilation to maintain airborne concentration limits below recommended exposure limits.

Eye and Face Protection

Wear safety glasses; use face shield if splashing is possible.

Skin Protection

Oil or chemical resistant gloves should be used to minimize contact. Wear apron or boots if appropriate.

Respiratory Protection

A NIOSH or MSHA approved respirator should be used in areas with high vapor concentrations or oil misting or when exposure limits are exceeded.
